How To Capture Screenshots On Samsung Galaxy S6 Or S6 Edge

When it comes to taking a screenshot on Samsung's newest device, the Galaxy S6 or S6 Edge, the process is really simple. In fact, if you have used any previous Galaxy smartphone such as Galaxy S5 then chances are that you already know how to capture a screenshot on the S6 as the process has stayed the same.

Bu if you are new to Android or Samsung, then read on to learn how to capture a screenshot on your brand new Galaxy S6 or S6 Edge.

**How to take screenshot on Galaxy S6 or S6 Edge**

To take a screenshot on Samsung Galaxy S6, simply open the app or the screen which you want to capture. Now, hold the power and home button at the same time, which will capture the screenshot. Yes, it's as simple as that. This same method can also be applied to the Samsung Galaxy S6 Edge.

Once the screenshot is captured, the screen will flash and you can hear a camera shutter sound.
A shortcut to the newly captured screenshot will be placed in the Notifications bar, or you can view this screenshot from the Gallery app or Samsung's built-in file manager known as "My Files".

There's also another method to capture a screenshot. You can also do this with the help of your palm. Simply swipe the screen with the edge of your hand across it, from side to side, keeping in contact with the screen.

If this setting for taking screenshots is disabled, then you can enable it from: Settings > Motion > Motions and gestures, and tap on "Palm swipe to capture." Now you have enabled this setting.
