Feature Article: The $1bn Club – Largest Hedge Fund Managers
This month, we take a look at the ‘$1bn Club’, a group of the world’s largest hedge fund managers. In the 12 months since Preqin’s last $1bn Club report, there have been significant changes to the make-up of the group, not least the 170 hedge fund managers entering the club.

Lead Article: Hedge Fund Asset Flows
In this month’s lead article, Preqin examines the latest hedge fund asset flow data to Q1 2016 by strategy, recent fund performance, fund size and manager headquarters.

Preqin Industry News
$1bn Club managers established in 2015 have the fourth highest average AUM of any year of establishment. With this being driven largely by high-profile spin-offs from established fund managers, we take a look at other recent spin-offs and high-profile launches in the industry.

The Facts
- Performance Benchmarks
- In Focus: Latin America
- US Public Pension Funds Update: NYCERS Departs
- Fund Searches and Mandates

Conferences
Upcoming hedge fund conferences around the world that Preqin will be attending in the near future.

Queen’s Award for Enterprise 2016
Preqin is proud to announce that it has been awarded a Queen’s Award for Enterprise in the category of International Trade. The award recognizes Preqin as an outstanding UK business, citing excellence in its field and sustained growth in its overseas business. Thank you to our customers for making this possible.
Dear Spotlight reader,

Prequin will be in Amsterdam for the annual GAIM Ops Amsterdam conference and is pleased to offer Spotlight readers a £100 discount off the conference fee to attend.

Attend to join your peers and exchange approaches to your operations and compliance challenges:

- Managing and Completing Regulatory Reporting
- Valuation Issues Facing CFOs and COOs under the AIFMD Regulatory Regime
- Application of FCPA and anti-bribery statutes to international investments
- How to hire, assess and determine if new talent is a fit for your organization
- Practical Considerations Around the Receipt and Handling of Non-public, “Insider” Information
- Lessons in ODD Across Asset Classes and Regions
- PLUS - Gain complimentary access to GAIM 2016 – Where Global Alternative Investment Managers and Investors collaborate to drive capital, implement new industry standards and source cutting edge information on future returns

As a valued reader, we are pleased to offer you a £100 discount off the registration fee, please quote VIP Code: FKN2456APREQ to claim your discount.

To register or if you have any questions, please contact us on +44 (0) 20 7017 7200, email info@icbi.co.uk or visit us online at http://www.icbi-events.com/FKN2456APREQ.

Kindest regards,

The Prequin Team
The $1bn Club: Largest Hedge Fund Managers

This month, Janet Chambers takes a look at the ‘$1bn Club’, a group of the world’s largest hedge fund managers. In the 12 months since Preqin’s last $1bn Club report, there have been significant changes to the make-up of the group, not least the 170 hedge fund managers entering the club.

Following an underwhelming 2015 and a slow start to 2016 in terms of performance, hedge fund managers have experienced two consecutive quarters of net outflows to Q1 2016 (see page 6). However, one group of managers that continues to dominate the assets of the hedge fund industry is the $1bn Club – hedge fund managers with at least $1bn in assets under management (AUM). Established members of the club draw attention from institutional investors, with $1bn Club managers experiencing strong success in raising capital. 2016 has seen new entrants to the $1bn Club, including newer hedge fund managers that have shown strong credentials at previous firms, as well as more established managers that have experienced a steady growth in AUM. This article looks at the current make-up of the $1bn Club and how it has changed over the past year.

Preqin’s Hedge Fund Online currently details 668 managers with at least $1bn in AUM, with the club increasing by a net 98 members over the past year. The $1bn Club accounts for 12% of all hedge fund managers, yet represents 88% of hedge fund industry assets. However, despite the increasing number of managers joining the $1bn Club, the proportion of industry assets these firms represent has declined from 92% in 2015.

Managers with $20bn or more in AUM have seen their assets decline by 15% since May 2015, implying that even the elite have not been immune to redemptions from institutional investors over the past 12 months. Bridgewater Associates maintains its position as the largest hedge fund manager in the world (Fig. 1); however, the AUM of Bridgewater Associates has fallen to $146bn as of February 2016 – a decline of $23bn from Q1 2015. Two systematic firms focused on statistical and mathematical modelling have entered the top 10 in 2016, Renaissance Technologies and Two Sigma Investments.

Fig. 2: Distribution of Assets under Management within the $1bn Club

Fig. 3: $1bn Club Managers by Strategy Employed

Inside the $1bn Club

Managers with $20bn or more in AUM have seen their assets decline by 15% since May 2015, implying that even the elite have not been immune to redemptions from institutional investors over the past 12 months. Bridgewater Associates maintains its position as the largest hedge fund manager in the world (Fig. 1); however, the AUM of Bridgewater Associates has fallen to $146bn as of February 2016 – a decline of $23bn from Q1 2015. Two systematic firms focused on statistical and mathematical modelling have entered the top 10 in 2016, Renaissance Technologies and Two Sigma Investments.

Source: Preqin Hedge Fund Online
As seen in Fig. 2, the largest proportion (27%) of industry assets are attributed to managers with total AUM of $1-4.9bn. Over the past year, aggregate AUM of managers in the $10-19.9bn bracket has surpassed that of managers with $20bn or more in assets, standing at $675bn and $672bn respectively.

Structures and Strategies of $1bn Club Managers

CTAs started 2016 strongly with the Preqin All-Strategies CTA benchmark showing positive Q1 returns and outperforming the Preqin All-Strategies Hedge Fund benchmark in January and February. However, managed futures/CTAs account for only a small proportion (5%) of the strategies offered by the $1bn Club, with these funds most prevalent among managers in the $20bn+ bracket (7%), as shown in Fig. 3.

Multi-strategy funds are most common among the largest managers in the $1bn Club, with 20% of managers with at least $20bn in AUM employing the strategy. As these funds trade in multiple markets they are able to accumulate greater AUM without compromising their overall strategy and returns potential. Other strategies often do not have the potential to scale to such large sizes. In contrast, we see a more focused investment approach from the smallest managers, with only 10% employing a core multi-strategy approach.

Larger AUM provides scope to launch more hedge funds; as shown in Fig. 4, 13% of the largest hedge fund managers offer 10 or more core hedge fund strategies to institutional investors. Conversely, managers with fewer resources in the $1bn Club typically offer lower numbers of hedge fund strategies, with just over half (51%) of hedge fund managers with $1-4.9bn in AUM offering just one hedge fund strategy.

Hedge funds offered by the $1bn Club most widely use a commingled fund structure; three-quarters of $1bn Club managers offer this type of fund. The $1bn Club are also increasingly using alternative structures to launch new funds: UCITS structures accounted for 21% of all funds launched in 2015 by current $1bn Club managers, compared with 15% in 2014. Nearly half (48%) of the UCITS funds launched by current $1bn Club managers in 2015 were by North America-based firms, compared with 26% in 2014, which shows that North America-based managers see the potential in the European UCITS wrapper (Fig. 5).

Location of $1bn Club

North America-based hedge fund managers dominate the $1bn Club: 72% of the largest hedge fund managers globally hail from the region, up five percentage points from 2015. Currently, North America is home to 479 $1bn Club managers, which hold just over $2tn in total AUM, followed by Europe with 129 $1bn Club managers managing $605bn. Asia-Pacific (51) and Rest of World (9) make-up the remainder of the $1bn Club, with managers located in these areas.

Source: Preqin Hedge Fund Online
regions managing an aggregate $102bn and $21bn respectively.

New York remains the headquarters of choice for the $1bn Club; 236 managers are currently based in the state (Fig. 6), an increase of 34 managers from 2015. However, the AUM of these managers has decreased to $986bn in 2016 from just over $1tn in 2015. As seen in Preqin’s recent factsheet, Connecticut is home to some of the largest hedge fund managers in the world and is the second largest US state in terms of hedge fund AUM ($313bn). Furthermore, 98% of all Connecticut-based hedge fund AUM is managed by 42 $1bn Club managers.

North America continues to be the hub of the $1bn Club with New York as its beacon and London leading the way for those outside North America. New York remains the headquarters of choice for the $1bn Club; 236 managers are currently based in the state (Fig. 6), an increase of 34 managers from 2015. However, the AUM of these managers has decreased to $986bn in 2016 from just over $1tn in 2015. As seen in Preqin’s recent factsheet, Connecticut is home to some of the largest hedge fund managers in the world and is the second largest US state in terms of hedge fund AUM ($313bn). Furthermore, 98% of all Connecticut-based hedge fund AUM is managed by 42 $1bn Club managers.

Representing Europe, London is the second most common headquarters of the $1bn Club; 82 managers are headquartered in London, managing $390bn in total assets. New entrants in this year’s top 12 locations are Paris and Minnesota, with São Paulo and Florida dropping out in 2015.

New Entrants and Dropouts in the $1-4.9bn Bracket

All the $1bn Club members that appeared in Preqin’s 2015 $1bn Club report but not in this current edition have dropped out of the $1-4.9bn bracket. Similarly, the vast majority of new entrants to the $1bn Club in 2016 manage $1-4.9bn in AUM. As shown in Fig. 7, North America represents 84% of all new entrants to the $1-4.9bn bracket, while Europe- (10%) and Asia-Pacific-based (6%) managers represent significantly smaller proportions. Forty-two percent of new entrants to the smallest bracket utilize equity strategies, compared to 46% of members that have dropped out of the club; event driven, credit and relative value strategies are employed more by new entrants than dropouts (Fig. 8).

Five firms established in 2015 have already amassed assets of $1bn or more. Three of the $1bn Club firms established in 2015 are spin-offs: Verde Asset Management, Systematica Investments and Garda Capital Partners. In early 2015, BlueCrest Capital decided to spin out its systematic hedge fund business to launch Systematica Investments with $8.5bn, pushing BlueCrest out of the $20bn or more AUM bracket, before its conversion to a family office. Verde Asset Management spun off Credit Suisse Hedging-Griffo, and Garda Capital Partners is a spinout of Black River Asset Management’s relative value strategies hedge fund arm. The two remaining $1bn Club entrants established in 2015 are from two well-known hedge fund firms. Scott Bessent launched Key Square Group following his time as George Soros’ right-hand man, and former Eton Park Capital Management partner Isaac Corre launched Governors Lane in Q2 2015.

Outlook

With the number of managers exceeding $1bn in AUM increasing, the $1bn Club continues to control a substantial portion of the hedge fund industry’s assets. Some new managers with an existing attractive pedigree have been able to obtain large capital commitments from day one, while more established firms have entered the club through asset growth. The differences between the largest and smallest $1bn Club managers are still evident in 2016, with the largest managers able to offer more strategies to institutional investors, leading the $1bn Club in CTA, macro and multi-strategy offerings.

So far in 2016, we have seen some big-name hedge fund investors handing in redemption notices including NYCERS and MetLife; despite these large institutional investors withdrawing capital commitments from $1bn Club managers, the largest hedge funds have still seen net inflows over Q1 2016 (see page 7). Relying on their experience and ability to produce risk-adjusted returns under all market conditions to distinguish themselves from the rest of the industry, the $1bn Club will look to maintain and build on its leading position within the hedge fund industry.

Fig. 7: $1-4.9bn Managers: New Entrants vs. Dropouts by Manager Location

Fig. 8: $1-4.9bn Managers: New Entrants vs. Dropouts by Top-Level Strategy
Hedge Fund Asset Flows

In this month’s lead article, Preqin examines the latest hedge fund asset flow data in Q1 2016 by strategy, recent fund performance, fund size and manager headquarters.

Despite disappointing returns during 2015, hedge funds still attracted a $71.4bn net inflow of assets from investors over the course of the year, with the majority of the inflows occurring in H1 2015. Examining investor flows by strategy reveals a more detailed picture of investor sentiment towards the asset class.

Fig. 2 shows the breakdown of investors’ allocation plans for 2016 by strategy and shows that 29% of respondents plan to allocate more capital to CTA funds; comparatively, only 5% plan to reduce allocations. Correspondingly, in Q1 2016, 29% of respondents plan to allocate more capital to CTA funds; comparatively, only 5% plan to reduce allocations. Correspondingly, in Q1 2016, CTAs have seen the highest inflow of all strategies at $13.7bn. However, when considering the number of CTAs that received inflows (Fig. 3), this fell into the hands of a relatively small proportion (40%) of managers in this sector, with nearly half of all CTAs witnessing outflows in the first quarter of the year.

In contrast to investor plans for CTAs in 2016, nearly four times as many investors planned to reduce their exposure to credit strategies during the year than planned to increase their holdings in these strategies. In turn, this resulted in the largest outflow during the quarter: $11.9bn was redeemed from credit strategies fund managers in Q1 2016.

Following the inflows of 2015, 2016 started with the industry experiencing a $14.3bn net outflow of assets. Coupled with the recent announcement by New York City Employees’ Retirement System of its withdrawal from the asset class, it has been a disappointing start to the year for hedge fund managers. However, looking past the headline figures a more nuanced story emerges. Fig. 4 shows the proportion of funds receiving inflows in Q1 2016 in terms of their performance during 2015; this reveals a clear correlation between strong past performance and the likelihood of attracting new capital. With 53% of funds achieving a return of greater than 5.00% in 2015 also receiving investor inflows in the first quarter of 2016, it is clear that a strong track record in 2016 is an important consideration for investors when allocating capital to the industry today.

*Private Equity includes buyout, venture capital, distressed, growth, natural resources and mezzanine funds.

**Buyout deals**: Preqin tracks private equity-backed buyout deals globally, including LBOs, growth capital, public-to-private deals, and recapitalizations. Our coverage does not include private debt and mezzanine deals.

***Venture capital deals**: Preqin tracks cash-for-equity investments by professional venture capital firms in companies globally across all venture capital stages, from seed to expansion phase. The deals figures provided by Preqin are based on announced venture capital rounds when the capital is committed to a company.
Preqin Industry News

Five managers established in 2015 have already amassed $1bn or more in AUM. With this being driven largely by high-profile spin-offs from established fund managers, Chris Beales takes a look at other recent spin-offs and high-profile launches in the industry.

Cider Mill Investments

April 2016 saw Connecticut-based Cider Mill Investments, founded by former Shumway Capital executive Tom Wilcox, officially begin trading with approximately $150mn in assets. Wilcox’s Cider Mill Investments follows the path of other hedge funds launched by previous Shumway Capital executives, such as March Altus, Glade Brook Capital and Bluemar Capital Management.

Cider Mill Fund intends to invest opportunistically across all global equity sectors, adopting a fundamental bottom-up approach while applying a top-down view to analyze potential risks and opportunities. The fund aims to outperform the S&P 500 Index and the MSCI World Index over the long term with similar or less volatility.

Case Equity Partners

Case Equity Partners is a Hong Kong-based investment manager focused on global event driven investments. The firm aims to provide investors with long-term risk-adjusted returns. It was founded in 2012 by Michael Wegener to initially run an event driven strategy as a family office. In March 2016, the firm launched its debut event driven hedge fund vehicle available to external investors. Prior to founding Case Equity Partners, Wegener was a vice president at Deutsche Bank.

Case Equity Partners Opportunities Fund is an event driven hedge fund investing across global equity markets. The fund seeks long-term risk-adjusted return following a value-plus catalyst investment style. Core strategies utilized by the fund include merger arbitrage and special situations. The investment team employs a fundamental research-driven approach, with a focus on activist-driven and complex situations that the team believes has a positive risk/reward proposition.

Social Capital PEP Management

Social Capital PEP Management, an affiliate of venture capital firm Social Capital, was founded in 2016. The firm is led by CEO Chamath Palihapitiya, a former Facebook executive. The firm provides discretionary investment advisory services to private investment funds pursuing long/short equity strategies to invest in public markets. The firm may also provide services to separately managed accounts.

Source: 2016 Preqin Sovereign Wealth Fund Review

According to the recently launched 2016 Preqin Sovereign Wealth Fund Review, 32% of sovereign wealth funds currently invest in hedge funds globally, a slight decrease from 33% 12 months ago. Such investors are unique in their position as long-term allocators to the asset class, and with large amounts of capital at their disposal. Many sovereign wealth funds active in the hedge fund industry are equipped with the experience and expertise necessary to profit from the complex strategies and potential rewards offered by hedge funds.

Beijing-based China Investment Corporation (CIC) is one such sovereign wealth fund that plans to be active in the hedge fund industry in the next 12 months, looking to make new investments opportunistically. The sovereign wealth fund is location agnostic and open to most strategies. CIC was founded in 2007 by the Chinese Government with $200bn in capital, and has grown to become one of the largest sovereign wealth funds in the world.

Do you have any news you would like to share with the readers of Spotlight? Perhaps you’re about to launch a new fund, have implemented a new investment strategy, or are considering investments beyond your usual geographic focus?

Send your updates to spotlight@preqin.com and we will endeavour to publish them in the next issue.
April proved to be a positive month across all top-level strategies and regions, with the Preqin All-Strategies Hedge Fund benchmark returning 1.43% for the month. Equity strategies were the top performers for a second consecutive month, generating a return of 1.72% in April following 3.37% in March, undoing the losses of early 2016 to sit at 0.00% at the end of April. Macro strategies funds maintained their position as the only top-level hedge fund strategy to generate positive performance in every month of 2016.

Emerging markets continued their run of positive returns, posting 2.10% in April, significantly outperforming all other regions for the month. This recent outperformance is further highlighted when considering the year-to-date returns of North America- (+0.86%) and Europe-focused (-1.52%) hedge funds compared with the 2.84% returned by emerging markets-focused funds (Fig. 2). For a detailed analysis of the hedge fund industry in Latin America, please see page 11.
In Focus: Latin America

Here we provide an overview of the Latin American hedge fund industry at present, including fund managers, investors and performance.

New York City Employees’ Retirement System Departs Hedge Funds: US Public Pension Funds Update

Comment:

In September 2014 the decision made by CalPERS to exit the hedge fund asset class dominated the headlines of the financial press. At that time we noted that this did not signal the start of widespread redemptions by US public pension funds from the hedge fund sector. Fast forward 19 months and trustees of another notable US public institution – New York City Employees’ Retirement System (NYCERS) – have voted to unwind their portfolio of hedge funds. The pension fund, which has been investing in hedge funds since 2010 and invested nearly $1.5bn in the asset class, cited concerns over performance as one of the reasons for the disinvestment. As our 2016 Preqin Global Hedge Fund Report revealed, there are currently quite widespread levels of dissatisfaction with hedge fund performance – approximately one-third of institutional investors that participated in our end of 2015 survey reported to Preqin that their hedge fund portfolio had failed to live up to expectations. With this in mind, we took another look at the current state of the hedge fund industry and appetite among US-based public pension funds for these funds to see if there are wider signs of further outflows from these investors. Our findings, as shown in Figs. 1-4, reveal that public retirement systems in the US look set to remain committed to the asset class. In fact, there are more US-based public pension funds investing in hedge funds than ever and these pension funds are dedicating ever-growing portions of their portfolios to investment in the asset class (Fig. 1). Public pension funds from across the US have current investments in hedge funds (Fig. 4), and combined, these funds invest more than $300bn in the asset class – nearly 10% of all the capital at work in hedge funds today.
