HUSSMAN STRATEGIC GROWTH FUND

Comparison of the Change in Value of a \$10,000 Investment in Hussman Strategic Growth Fund versus the Standard & Poor's 500 Index and the Russell 2000 Index^(a) (Unaudited)

Average Annual Total Returns

For Periods Ended December 31, 2015

	1 Year	3 Years	5 Years	10 Years	Since Inception ^(b)
Hussman Strategic Growth Fund ^{(c)(d)}	(8.40%)	(7.84%)	(7.01%)	(3.67%)	2.25%
S&P 500 Index	1.38%	15.13%	12.57%	7.31%	4.19%
Russell 2000 Index	(4.41%)	11.65%	9.19%	6.80%	6.68%

^(a) The Hussman Strategic Growth Fund invests in stocks listed on the New York, American, and NASDAQ exchanges, and does not specifically restrict its holdings to a particular market capitalization. The S&P 500 and Russell 2000 are indices of large and small capitalization stocks, respectively. "HSGFX equity investments and cash equivalents only (unhedged)" reflects the performance of the Fund's stock investments and modest day-to-day cash balances, after fees and expenses, but excluding the impact of hedging transactions. The Fund's unhedged equity investments do not represent a separately available portfolio, and their performance is presented solely for purposes of comparison and performance attribution.

^(b) The Fund commenced operations on July 24, 2000.

^(c) Returns do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares.

^(d) The Adviser has contractually agreed to defer its investment advisory fees and/or absorb or reimburse Fund expenses until at least November 1, 2016 to the extent necessary to limit the Fund's annual ordinary operating expenses to an amount not exceeding 1.10% annually of the Fund's average daily net assets. This limit on operating expenses was increased from 1.07% to 1.10% effective November 1, 2015. The gross expense ratio as disclosed in the November 1, 2015 prospectus was 1.15%.

HUSSMAN STRATEGIC TOTAL RETURN FUND

Comparison of the Change in Value of a \$10,000 Investment in Hussman Strategic Total Return Fund versus the Barclays U.S. Aggregate Bond Index^(a) (Unaudited)

Average Annual Total Returns

For Periods Ended December 31, 2015

	1 Year	3 Years	5 Years	10 Years	Since Inception ^(b)
Hussman Strategic Total Return Fund ^{(c)(d)}	(1.01%)	(1.99%)	(0.20%)	3.56%	4.52%
Barclays U.S. Aggregate Bond Index	0.55%	1.44%	3.25%	4.51%	4.41%

^(a) The Barclays U.S. Aggregate Bond Index covers the U.S. investment grade fixed rate bond market, with index components for U.S. government, agency and corporate securities. The Fund does not invest solely in securities included in the Barclays U.S. Aggregate Bond Index and may invest in other types of bonds, as well as common stocks, exchange-traded funds and other securities.

^(b) The Fund commenced operations on September 12, 2002.

^(c) Returns do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares.

^(d) The Adviser has contractually agreed to defer its investment advisory fees and/or absorb or reimburse Fund expenses until at least November 1, 2016 to the extent necessary to limit the Fund's annual ordinary operating expenses to an amount not exceeding 0.70% annually of the Fund's average daily net assets. This limit on operating expenses was increased from 0.68% to 0.70% effective November 1, 2015. The gross expense ratio as disclosed in the November 1, 2015 prospectus was 0.76%.

HUSSMAN STRATEGIC INTERNATIONAL FUND

Comparison of the Change in Value of a \$10,000 Investment in Hussman Strategic International Fund versus the MSCI EAFE Index^(a) (Unaudited)

Average Annual Total Returns

For Periods Ended December 31, 2015

	1 Year	3 Years	5 Years	Since Inception ^(b)
Hussman Strategic International Fund ^{(c)(d)}	(0.78%)	(1.94%)	(2.24%)	(1.13%)
MSCI EAFE Index	(0.81%)	5.01%	3.60%	4.28%

^(a) The MSCI EAFE (Europe, Australasia, and Far East) Index is a free float-adjusted weighted capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. As of December 31, 2015, the MSCI EAFE Index consisted of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The Fund may not invest in all of the countries represented in the MSCI EAFE Index and may invest in securities that are not included in the MSCI EAFE Index.

^(b) The Fund commenced operations on December 31, 2009.

^(c) Returns do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares.

^(d) The Fund's annualized expense ratio was 2.00% for the six months ended December 31, 2015. The expense ratio as disclosed in the November 1, 2015 prospectus was 1.65%.

HUSSMAN STRATEGIC DIVIDEND VALUE FUND

**Comparison of the Change in Value of a \$10,000 Investment in
Hussman Strategic Dividend Value Fund versus the Standard & Poor's 500 Index^(a) (Unaudited)**

Average Annual Total Returns

For Periods Ended December 31, 2015

	1 Year	3 Years	Since Inception ^(b)
Hussman Strategic Dividend Value Fund ^{(c)(d)}	(8.39%)	(0.70%)	(0.28%)
S&P 500 Index	1.38%	15.13%	13.75%

^(a) The Hussman Strategic Dividend Value Fund invests primarily in securities of U.S. issuers but may, from time to time, hold significant investments in dividend paying stocks of foreign companies in developed countries. There are no restrictions as to the market capitalization of companies in which the Fund invests. The S&P 500 Index is believed to be the most appropriate broad-based securities market index against which to compare the Fund's long-term performance. However, the Fund may invest in securities that are not included in the S&P 500 Index, and may vary its exposure to market fluctuations depending on market conditions.

^(b) The Fund commenced operations on February 6, 2012.

^(c) Returns do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares.

^(d) The Adviser has contractually agreed to defer its investment advisory fees and/or absorb or reimburse Fund expenses until at least November 1, 2016 to the extent necessary to limit the Fund's annual ordinary operating expenses to an amount not exceeding 1.25% annually of the Fund's average daily net assets. The gross expense ratio as disclosed in the November 1, 2015 prospectus was 4.01%.

Dear Shareholder,

The Hussman Funds continue to pursue a disciplined, value-conscious, risk-managed and historically-informed investment approach focused on the complete market cycle. Within this full-cycle perspective, my view is that the sideways volatility in the U.S. financial markets since 2014, particularly in equities and low-grade debt, most likely reflects the top-formation of the third speculative bubble in 15 years. On the basis of the valuation measures we find most strongly correlated with actual subsequent market returns (and that have *fully retained* that correlation even across recent market cycles), recent valuation extremes imply a 40-55% market loss over the completion of the current market cycle, with zero nominal and negative real total returns for the Standard & Poor's 500 Index on a 10-12 year horizon.

These are not worst-case scenarios, but run-of-the-mill expectations. They reflect the outcomes that would be expected given only a return to valuation levels that have been approached or breached in every other market cycle across history, including periods prior to the 1960's when U.S. interest rates were not much different from present levels.

The past year was largely a transition period in the financial markets. After significant volatility, the S&P 500 Index achieved a total return of 1.38% for the year ended December 31, 2015. The MSCI EAFE Index had a total return of -0.81% for the year, and the Barclays U.S. Aggregate Bond Index achieved a total return of 0.55%. During this time, our investment strategy was generally positioned in anticipation of market weakness that did not emerge until early 2016. As of this writing (February 18, 2016), the S&P 500 Index remains within 10% of its 2015 record high, but even the modest market turbulence of recent months has been sufficient to place all four of the Hussman Funds ahead of their respective benchmarks for the period from December 31, 2014 to the present. While this may change, it is instructive how quickly the relative performance of risk-managed investment strategies versus passive strategies can shift during a general market decline.

Recall that, on a total return basis, the S&P 500 Index lost -47.41% from its bull market peak on September 1, 2000 to its bear market low on October 9, 2002, while Strategic Growth Fund gained 47.83%. Assuming equal initial investments in the S&P 500 Index and Strategic Growth Fund at that bull market peak, an investment in Strategic Growth Fund, by the end of the bear market, would have been worth 2.81 times the value of the investment in the S&P 500. Similarly, between the bull market peak of the S&P 500 Index on October 9, 2007 to the bear market low on March 9, 2009, an investment in Strategic Growth Fund would have grown to 2.09 times the value of the same investment in the S&P 500. Past performance is not an

The Hussman Funds

Letter to Shareholders *(continued)*

assurance of future results, and Strategic Growth Fund may perform differently in future bear market periods, but these outcomes illustrate how the tables can turn in the relative performance of risk-managed investment strategies over the completion of a full market cycle.

I've regularly observed that, while long-term investment returns are tightly correlated with reliable measures of valuation, investment returns over shorter portions of the market cycle are primarily driven by the willingness or aversion of investors to accept risk. Historically, we've found that the most reliable measure of investor risk-preferences is the behavior of market internals across a broad range of individual stocks, industries, sectors, and security types, including debt securities of varying creditworthiness. The reason is straightforward: when investors are inclined to speculate, they tend to be indiscriminate about it. A uniform advance across a broad range of securities is an indication of risk-seeking, while divergent market behavior is an indication of growing risk aversion.

More than a year ago, I detailed the central adaptation to our investment discipline that was necessary as a result of extraordinary monetary policy during the advancing half-cycle since 2009. In prior market cycles across history, the emergence of extreme "overvalued, overbought, overbullish" features of market action was regularly accompanied or closely followed by deterioration in broad market internals, and steep market losses would typically follow. In recent years, the Federal Reserve's policies of quantitative easing (QE) and near-zero interest rates encouraged persistent speculation despite these extremes. In the face of QE, one needed to wait for explicit deterioration in market internals (indicating that investors had shifted toward risk-aversion) before adopting a clearly negative market outlook.

Importantly, monetary easing in itself is not what supports speculation. Rather, monetary easing generally only amplifies speculation in markets where investors are already inclined to embrace risk. The central function of quantitative easing and a zero interest rate policy is to flood the financial system with base money that someone has to hold at every moment in time, until it is retired by the Fed. That base money never comes "off the sidelines" - it merely changes hands. Provided that investors are risk-seeking, each successive holder tries to pass that base money off to someone else, typically by buying a riskier security that might provide a higher yield (as long as the risk of capital losses can be ignored). The investor who sold that security gets the cash, and the cycle continues. Put simply, when a central bank executes QE in a market where investors are already inclined to seek risk, the excess base money acts as a hot-potato that passes from one investor to another.

The Hussman Funds

Letter to Shareholders *(continued)*

But a central requirement for easy money to have a speculative effect is that investors can't be too concerned about capital losses. When investors reach for yield, the quiet assumption is that the extra yield will not be wiped out by a decline in price. That belief may be widely held in a risk-seeking environment, but it fails to hold in a risk-averse one. Once market internals deteriorate in an extremely overvalued market, conveying that risk-aversion is increasing in the presence of thin risk premiums, the jig is up. This is why persistent Fed easing was wholly ineffective during the 2000-2002 and 2007-2009 collapses. This is why we find in the historical data that central bank easing only supports risk-assets when investors are already inclined to embrace risk.

This is the correct lesson to learn from the sequential bubbles and crashes since 2000, and it is one that effectively distinguishes those crashes from the intervening speculative episodes. In the absence of a fresh improvement in market action, the stock market remains vulnerable to significant market losses, and Fed easing is likely to prove ineffective in preventing these losses, as it was during the collapse of the two previous bubbles since 2000.

Fund Performance

Strategic Growth Fund

For the year ended December 31, 2015, the total return of Strategic Growth Fund was -8.40%, attributable both to a modest lag in the performance in the Fund's holdings relative to the capitalization-weighted indices it uses to hedge, and to decay in the time-value of index put options held by the Fund. The persistent deterioration in market internals during 2015 exerted a significantly greater negative effect on the broad market and equal-weighted indices than on capitalization-weighted indices such as the S&P 500, which gained 1.38% for the year. While we view that deterioration as the likely precursor for broad market losses, as it was in 2000 and 2007, the shorter-term impact on Fund returns during 2015 was negative.

From the inception of Strategic Growth Fund on July 24, 2000 through December 31, 2015, the Fund achieved an average annual total return of 2.25%, compared with an average annual total return of 4.19% for the S&P 500 Index. Over that period, an initial \$10,000 investment in the Fund would have grown to \$14,090, compared with \$18,850 for the same investment in the S&P 500 Index. The deepest loss experienced by the Fund since inception was -41.02%, compared with a maximum loss of -55.25% for the S&P 500 Index. Meanwhile, the stock selection approach of the Fund has outperformed the S&P 500 by 4.10% (410 basis points) annually from the inception of the Fund on July 24, 2000 through December 31, 2015.

The Hussman Funds

Letter to Shareholders *(continued)*

Even at its lowest interim points, the Fund has experienced much smaller declines than those that the S&P 500 has repeatedly experienced since 2000. Note that in order to lose -55.25% (as the S&P 500 Index did following steep overvaluation in 2007 much like the present), one must first lose -41.02%, and then lose an additional -24.13%.

Strategic Total Return Fund

For the year ended December 31, 2015, the total return of Strategic Total Return Fund was -1.01%, compared with a total return of 0.55% for the Barclays U.S. Aggregate Bond Index. The Fund held a relatively conservative position in bonds during this time, with a duration typically ranging between 2-6 years (meaning that a 100 basis point move in interest rates would be expected to affect Fund value by about 2%-6% on the basis of bond price fluctuations). During 2015, the yield on 10-year U.S. Treasury bonds increased from 2.17% to 2.27%, resulting in a relatively flat total return in bonds. An additional driver of fluctuations in the Fund's investment returns during this period was its exposure to precious metals shares. While this exposure was generally modest, gold stocks as measured by the Philadelphia Gold and Silver Sector Index (XAU) had a total return of -33.42% for the year, and the Fund's holdings in this area contributed to a slight reduction in returns.

From the inception of Strategic Total Return Fund on September 12, 2002 through December 31, 2015, the Fund achieved an average annual total return of 4.52%, compared with an average annual total return of 4.41% for the Barclays U.S. Aggregate Bond Index. Over that period, an initial \$10,000 investment in the Fund would have grown to \$17,996, compared with \$17,745 for the same investment in the Barclays U.S. Aggregate Bond Index. The deepest loss experienced by the Fund since inception was -11.52%, compared with a maximum loss of -5.09% for the Barclays U.S. Aggregate Bond Index.

Strategic International Fund

For the year ended December 31, 2015, the total return of Strategic International Fund was -0.78%, compared with a total return of -0.81% in the MSCI EAFE Index. The Fund generally held a defensive portfolio focused on equities that we view as undervalued and having significant dividend yields. The Fund was partially exposed to currency fluctuations early in the year, which contributed to negative returns during the first and second quarters. In June 2015, following a rebound in the value of the euro and the Japanese yen, the composition of the Fund's hedges was altered in order to

The Hussman Funds

Letter to Shareholders *(continued)*

reduce the impact of both local equity fluctuations and broad currency fluctuations. This shift was effective in helping the Fund achieve a positive return during the second half of the year, despite a decline in the MSCI EAFE Index during that period.

From the inception of Strategic International Fund on December 31, 2009 through December 31, 2015, the Fund had an average annual total return of -1.13%, compared with an average annual total return of 4.28% for the MSCI EAFE Index. Over that period, an initial \$10,000 investment in the Fund would have declined to \$9,343, compared with \$12,862 for the same investment in the MSCI EAFE Index. The maximum decline of the EAFE Index was -26.48%, compared with a maximum decline of -21.77% for Strategic International Fund.

Strategic Dividend Value Fund

For the year ended December 31, 2015, the total return of Strategic Dividend Value Fund was -8.39%. This outcome largely reflected generally deteriorating internals in the broad market, which extended to value-oriented dividend-paying stocks. The capitalization-weighted S&P 500 Index had a total return of 1.38% during the same period.

From the inception of Strategic Dividend Value Fund on February 6, 2012 through December 31, 2015, the Fund had an average annual total return of -0.28%, compared with an average annual total return of 13.75% for the S&P 500 Index. Over that period, an initial \$10,000 investment in the Fund would have declined to \$9,890, compared with \$16,533 for the same investment in the S&P 500 Index. The deepest loss experienced by the Fund since inception was -9.35%, compared with a maximum loss of -14.66% for the S&P 500 Index.

Portfolio Composition

As of December 31, 2015, Strategic Growth Fund had net assets of \$602,758,396, and held 110 stocks in a wide variety of industries. The largest sector holdings as a percent of net assets were information technology (38.8%), health care (13.7%), consumer discretionary (11.5%), consumer staples (9.2%), financials (9.7%), and industrials (8.7%). The smallest sector weights were materials (5.1%), energy (3.2%), and utilities (1.0%).

Strategic Growth Fund's holdings of individual stocks as of December 31, 2015 were valued at \$607,969,030. Against these stock positions, the Fund also held 2,000 option combinations (long put option/short call option) on the S&P 500 Index, 1,300 option combinations on the Russell 2000 Index and 100 option combinations on the Nasdaq 100 Index. Each option combination behaves as a short sale on the

The Hussman Funds

Letter to Shareholders *(continued)*

underlying index, with a notional value of \$100 times the index value. On December 30, 2015, the S&P 500 Index closed at 2,043.94, while the Russell 2000 Index and the Nasdaq 100 Index closed at 1,135.89 and 4,593.27, respectively. The Fund's total hedge therefore represented a short position of \$602,386,400, thereby hedging 99.1% of the dollar value of the Fund's investment positions in individual stocks.

Though the performance of Strategic Growth Fund's diversified portfolio cannot be attributed to any narrow group of stocks, the following holdings achieved gains in excess of \$2 million during the six months ended December 31, 2015: Global Payments, First Solar, and NVIDIA. Holdings with losses in excess of \$3 million during this same period were Barrick Gold, Newmont Mining, and Vasco Data Security.

As of December 31, 2015, Strategic Total Return Fund had net assets of \$396,977,937. Treasury notes, Treasury bills, Treasury Inflation-Protected Securities (TIPS) and money market funds represented 77.9% of the Fund's net assets. Exchange-traded funds, precious metals shares and utility shares accounted for 8.3%, 13.8% and 0.2% of net assets, respectively.

In Strategic Total Return Fund, during the six months ended December 31, 2015, a portfolio gain in excess of \$1 million was achieved in United States Natural Gas Fund, LP. Holdings with losses in excess of \$2 million during this same period were Goldcorp, Newmont Mining and Barrick Gold.

As of December 31, 2015, Strategic International Fund had net assets of \$38,665,801 and held 67 stocks in a wide variety of industries. The largest sector holdings as a percent of net assets were consumer discretionary (21.8%), information technology (15.8%), health care (9.2%), industrials (9.1%), financials (6.5%), consumer staples (5.8%), and utilities (4.7%). The smallest sector weights were materials (3.7%) and telecommunication services (1.1%). Investment in shares of money market funds accounted for 10.5% of net assets.

Strategic International Fund's holdings of individual stocks as of December 31, 2015 were valued at \$30,046,988. In order to hedge the impact of general market fluctuations, as of December 31, 2015, Strategic International Fund was short 340 futures on the Mini MSCI EAFE Index. The notional value of this hedge was \$28,910,200, hedging 96.2% of the value of equity investments held by the Fund. When the Fund is in a hedged investment position, the primary driver of Fund returns is the difference in performance between the stocks owned by the Fund and the indices that are used to hedge.

The Hussman Funds

Letter to Shareholders *(continued)*

While Strategic International Fund's investment portfolio is diversified and the Fund's performance is affected by numerous investment positions, the hedging strategy of the Fund was primarily responsible for the reduced sensitivity of the Fund to market fluctuations from the Fund's inception through December 31, 2015. Individual equity holdings having portfolio gains in excess of \$500,000 during the six months ended December 31, 2015 included Lonza Group, Novartis, Smith & Nephew PLC – ADR and Reckitt Benckiser Group PLC. Holdings with portfolio losses in excess of \$350,000 during this same period included Electricite De France, Statoil ASA and Canadian Oil Sands.

As of December 31, 2015, Strategic Dividend Value Fund had net assets of \$7,778,017 and held 55 stocks in a wide variety of industries. The largest sector holdings as a percent of net assets were information technology (26.3%), consumer discretionary (19.1%), consumer staples (14.3%), industrials (11.9%), energy (7.9%), health care (6.3%), and materials (5.0%). The smallest sector weights were utilities (1.8%) and financials (1.6%).

Strategic Dividend Value Fund's holdings of individual stocks as of December 31, 2015 were valued at \$7,330,213. Against these stock positions, the Fund also held 35 option combinations (long put option/short call option) on the S&P 500. The notional value of this hedge was \$7,153,790, hedging 97.6% of the value of equity investments held by the Fund. When the Fund is in a hedged investment position, the primary driver of Fund returns is the difference in performance between the stocks owned by the Fund and the indices that are used to hedge.

In Strategic Dividend Value Fund, during the six months ended December 31, 2015, a portfolio gain in excess of \$50,000 was achieved in Kraft Heinz Company. Holdings with portfolio losses in excess of \$50,000 during this same period included Staples, Stage Stores, Mosaic Company and Kinder Morgan.

Supplementary information including quarterly returns and equity-only performance is available on the Hussman Funds website: www.hussmanfunds.com

Current Strategy and Outlook

From the standpoint of our investment discipline, the present environment couples the second most extreme market valuations in history (exceeded only by the 2000 bubble peak) with a clear deterioration in our measures of market internals. Many of our long-term concerns would persist regardless of the behavior of market action, as an improvement at these levels would not make reliable valuation measures any less extreme. However, the immediacy of our concerns would be substantially reduced

The Hussman Funds

Letter to Shareholders *(continued)*

in the event that our measures of market action were to improve. Ideally, such an improvement will follow a material retreat in valuations; a combination which has historically represented the best opportunity in the market cycle to shift toward an aggressive exposure to stocks.

In late-2015, we observed the combination of falling stock prices, widening credit spreads, a relatively modest spread between long-term and short-term interest rates, and a decline in the ISM Purchasing Managers Index below 50. While none of these measures is significantly correlated with economic recessions individually, the full combination – a syndrome that comprises our basic Recession Warning Composite – has generally been a useful early warning signal of oncoming economic difficulties, as I observed in real-time in 2000 and 2007. While employment weakness in 2011-2012 contributed to recession concerns that did not unfold in that instance, the foregoing set of conditions was not in place at that time, and the employment figures were later revised upward. Also, in contrast to 2011-2012, market internals in the present instance have been persistently unfavorable. As I've emphasized regularly since mid-2014 in my weekly commentaries on the Hussman Funds website (www.hussmanfunds.com), the behavior of market internals is an important "hinge" that distinguishes weakness in leading economic data that tends to be followed by recovery from weak leading economic data that tends to devolve into recession. We find that market internals act as a similar hinge in distinguishing the likely outcomes of overvaluation and Federal Reserve easing.

As we enter 2016, various measures of financial stress, particularly in the equity and low-grade credit markets, suggest that financial conditions have tightened. As in 2007 after a similar period of untethered speculation, the reason conditions have "tightened" is that low-grade borrowers were able to issue a mountain of questionable debt to yield-seeking speculators in recent years. Much of the proceeds were used to finance various forms of malinvestment, such as expanded oil/gas capacity and the repurchase of corporate equities at steep valuations. All of this was encouraged by the Federal Reserve's reckless policy of quantitative easing. As default concerns increase and investors become more risk-averse, low-grade credit has weakened markedly. The correct conclusion to draw, I believe, is that the consequences of misguided policies are predictably coming home to roost.

Prior to U.S. recessions, the earliest indications of an oncoming economic shift are usually observable in the financial markets, particularly in growing deterioration across broad market internals, and widening credit spreads between debt securities of varying creditworthiness. The next indication comes from measures of what I call "order surplus": new orders, plus backlogs, minus inventories. When orders and

The Hussman Funds

Letter to Shareholders *(continued)*

backlogs are falling while inventories are rising, a slowdown in production typically follows. If an economic downturn is broad, “coincident” measures of supply and demand, such as industrial production and real retail sales, then slow at about the same time. Real income slows shortly thereafter. The last to move are employment indicators - starting with initial claims for unemployment, next payroll job growth, and finally, the duration of unemployment.

Indications of oncoming recession are already evident in financial market strains, a weakening order surplus, and deterioration in our Recession Warning Composite not seen since the 2007-2009 downturn. Of course, it remains important to look for confirmation from other indications in the economic sequence. Notably, U.S. industrial production has declined in 10 of the past 12 months, which is an outcome that has never emerged except in the context of a U.S. recession. Our concerns about recession would be further amplified and confirmed by weakness in consumer confidence, real retail sales, real income, and later, in various employment measures.

The present syndrome of historically extreme equity valuations, poor market internals, widening credit spreads, and growing evidence of oncoming recession is familiar. The same set of observable conditions prompted my strong concerns in 2000 and 2007, both before steep market retreats and economic weakness. I don't hesitate to admit that in the face of extraordinary Federal Reserve activism during the advancing half-cycle since 2009, we could have experienced far better results had we required explicit deterioration in market internals before taking a negative market outlook in response to “overvalued, overbought, overbullish” features of market action. In mid-2014, we imposed that requirement on our methods of classifying market return/risk profiles. But that adaptation plays no role in the concerns that we have at present. If our measures of market internals were to improve materially, the immediacy of both our market and economic concerns would be significantly reduced, even if the same “overvalued, overbought, overbullish” extremes emerge. Presently, however, we observe the same evidence that allowed us to anticipate previous financial and economic distress.

Our investment outlook toward the equity market is decidedly negative at present. These concerns extend beyond the U.S. alone. Notably, the profound weakness in European bank stocks and spiking credit default swap spreads on those banks raise concerns about financial distress, while an industrial downturn in China raises similar concerns. As of mid-February 2016, Strategic Growth Fund continues to hold a broadly diversified portfolio of individual stocks, hedging against the impact of general market fluctuations using long-put / short-call index option combinations on the S&P 500, Nasdaq 100, and Russell 2000 Indices, currently setting the put option

The Hussman Funds

Letter to Shareholders *(continued)*

strike prices closer to current market levels than the strike prices of the corresponding short call options. While this position can experience greater time-decay as a result of higher put option premiums, it is commensurate with the severe market return/risk classification we presently identify, which easily places current conditions within the most negative 10% of all periods across history.

Conversely, in the most favorable return/risk classification we identify, Strategic Growth Fund may hold a fully unhedged investment position, augmented with “leverage” established by investing a few percent of Fund assets in call options. It is important to recognize that the Fund’s strategy fully anticipates the use of such aggressive investment positions, provided that market conditions are consistent with the expectation of strong equity market returns. Despite occasionally incorrect categorization by outside observers, Strategic Growth Fund is neither a market-neutral fund nor a bear market fund. As always, the best way to understand the Fund’s actual investment approach is to carefully read the Prospectus.

Strategic Dividend Value Fund also remains fully hedged at present, but with a “flat” hedge where the long-put and short-call index options have identical strike prices and expiration dates. While we observe less extreme and often reasonable valuations across the international equity markets, there is a marked tendency for international equity markets to decline in concert with significant declines in the U.S. equity market. For this reason, Strategic International Equity Fund also remains fully-hedged at present, using short futures contracts on the MSCI EAFE Index. A reduction in the severity of our U.S. market concerns would contribute to a more constructive outlook toward foreign markets.

With respect to Strategic Total Return Fund, Treasury securities are typically sought by investors as safe-havens in an environment of perceived economic and credit risk. However, 10-year Treasury yields have declined to about 1.7%, and at such low yields, Treasury bonds become vulnerable to abrupt yield spikes that can quickly wipe out years of anticipated income. As of mid-February 2016, Strategic Total Return Fund has reduced its average duration in Treasury bonds to just under 2 years (meaning that a 100 basis point change in interest rates would be expected to impact the Fund by less than 2% on the basis of bond price fluctuations). Our inclination, as is typical in this environment, is to expand the Fund’s duration in response to upward spikes in yield, and reduce that exposure on marked declines in yield.

I observed in the 1990’s that precious metals shares have usually fared particularly well in environments where nominal interest rates are declining, the year-over-year rate of inflation is advancing (even from a low level), leading economic data is relatively weak, and precious metals shares are depressed relative to the

The Hussman Funds

Letter to Shareholders *(continued)*

spot price of gold itself. Yet in recent years, precious metals shares have periodically been hit hard despite the presence of three or all four elements of this favorable “syndrome.” The reason, I think, has been the recurring specter of global deflation. A useful way to confine that risk has been to remain somewhat more cautious on this sector if the U.S. dollar index and credit spreads are both rising and inflation is subdued. Unlike 2008, when the dollar started at a somewhat depressed level on the basis of our valuation methods, the U.S. dollar has already been steeply bid up as a result of continuing QE in Europe and Japan. On that front, the U.S. Dollar Index has moved sideways over the past year, and as of January 2016, the rate of core inflation has increased to 2.22% on a year-over-year basis. While we continue to closely monitor market conditions for changes in these and related factors, we shifted to a clearly positive outlook on precious metals shares in early 2016. This is reflected in a larger investment position in precious metals shares within Strategic Total Return Fund, amounting to about 15% of Fund assets.

Discipline does not imply a static approach. It requires one to adapt to new evidence, but in my view, those adaptations should still be consistent with the lessons of history, without abandoning those lessons by carelessly repeating “this time is different.” In mid-2014, we addressed what I viewed as the central challenge that made our experience during the half-cycle since 2009 so different from our favorable experience in other complete market cycles. Despite the repeated emergence of “overvalued, overbought, overbullish” syndromes that had reliably been followed by steep market losses in prior cycles across history, the aggressively activist policy of the Federal Reserve since the global financial crisis required one to wait for explicit deterioration in market internals – indicating a shift toward risk-aversion among investors – before adopting a clearly negative market outlook. As I wrote a year ago:

“For those who trust and value our work, my hope is that we have clarified when and how we’ve adapted to the challenges of recent years in a way that helps to understand both the successes we’ve enjoyed over time and the difficulties that we’ve experienced in the recent half-cycle. Again, we cannot assure that future cycles will mirror the lessons of a century of historical evidence. What we do know for certain is that the framework that resulted from our recent challenges is robust to every market cycle we’ve observed across a century of history, including periods of growth, depression, peace, war, deflation, inflation, the late-1990’s bubble and crash, the housing bubble and crash, and even the most recent half-cycle since 2009.”

Put simply, I believe that we have fully adapted to the challenges and realities of policies that enabled three of the greatest speculative bubbles in history to emerge in sequence, and that our present methods have the capacity to distinguish those

The Hussman Funds

Letter to Shareholders *(continued)*

bubbles from the financial and economic collapses that have predictably followed. Markets move in complete cycles that include not only periods of speculation, rich valuations and uniformly advancing prices, but also periods of risk-aversion, depressed valuations, and persistent market losses. The speculative half-cycle that has emerged from the combination of risk-seeking fueled by monetary easing should not be confused for the complete cycle. Until market internals improve materially, risk-aversion – as it did in 2000-2002 and 2007-2009 – is likely to render further monetary easing wholly ineffective over the completion of the current market cycle. Our outlook will change as the evidence does.

All of the Hussman Funds have the ability to accept constructive, and in some cases, aggressive investment exposure to various financial markets, provided that we observe market conditions that have historically been associated with significant investment returns, on average. Historically, the strongest expected market return/risk profile we identify is associated with a material retreat in valuations that is then joined by an early improvement in market action. Those opportunities will undoubtedly emerge as market conditions change over time. Meanwhile, I remain confident that our value-conscious, risk-managed, historically-informed investment discipline is well-suited to navigate investment opportunities and risks over the completion of the current market cycle and those in the future.

As always, I remain grateful for your trust.

Sincerely,

John P. Hussman, Ph.D.

Past performance is not predictive of future performance. Investment results and principal value will fluctuate so that shares of the Funds, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted.

Weekly updates regarding market conditions and investment strategy, as well as special reports, analysis, and performance data current to the most recent month end, are available at the Hussman Funds website www.hussmanfunds.com.

An investor should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. The Funds' prospectuses contain this and other important information. To obtain a copy of the Hussman Funds' prospectuses please visit our website at www.hussmanfunds.com or call 1-800-487-7626 and a copy will be sent to you free of charge. Please read the prospectus carefully before you invest. The Hussman Funds are distributed by Ultimus Fund Distributors, LLC.

Estimates of prospective return and risk for equities, bonds and other financial markets are forward-looking statements based the analysis and reasonable beliefs of Hussman Strategic Advisors. They are not a guarantee of future performance and are not indicative of the prospective returns of any of the Hussman Funds. Actual returns may differ substantially from the estimates provided. Estimates of prospective long-term returns for the S&P 500 reflect valuation methods focusing on the relationship between current market prices and earnings, dividends and other fundamentals, adjusted for variability over the economic cycle.

This Letter to Shareholders seeks to describe some of the adviser's current opinions and views of the financial markets. Although the adviser believes it has a reasonable basis for any opinions or views expressed, actual results may differ, sometimes significantly so, from those expected or expressed. The securities held by the Funds that are discussed in this Letter to Shareholders were held during the period covered by this Report. They do not comprise the entire investment portfolios of the Funds, may be sold at any time and may no longer be held by the Funds. The opinions of the Funds' adviser with respect to those securities may change at any time.

Hussman Investment Trust

Notes to Financial Statements

December 31, 2015 (Unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund (each, a "Fund," and collectively, the "Funds") are diversified, separate series of Hussman Investment Trust (the "Trust"), which is registered under the Investment Company Act of 1940 as an open-end management investment company. Each Fund is authorized to issue an unlimited number of shares. Hussman Strategic Growth Fund commenced operations on July 24, 2000. Hussman Strategic Total Return Fund commenced operations on September 12, 2002. Hussman Strategic International Fund commenced operations on December 31, 2009. Hussman Strategic Dividend Value Fund commenced operations on February 6, 2012.

Hussman Strategic Growth Fund's investment objective is to provide long-term capital appreciation, with added emphasis on protection of capital during unfavorable market conditions.

Hussman Strategic Total Return Fund's investment objective is to provide long-term total return from income and capital appreciation, with added emphasis on protection of capital during unfavorable market conditions.

Hussman Strategic International Fund's investment objective is to provide long-term capital appreciation, with added emphasis on the protection of capital during unfavorable market conditions. The Fund invests primarily in equity securities of non-U.S. issuers.

Hussman Strategic Dividend Value Fund's investment objective is to provide total return through a combination of dividend income and capital appreciation, with added emphasis on protection of capital during unfavorable market conditions.

The following is a summary of significant accounting policies followed by the Funds. The policies are in conformity with accounting principles generally accepted in the United States of America ("GAAP"). As an investment company, as defined in Financial Accounting Standards Board ("FASB") Accounting Standards Update 2013-08, each Fund follows accounting and reporting guidance under FASB Accounting Standards Codification Topic 946 "Financial Services – Investment Companies."

Securities, Options and Futures Valuation — The Funds' portfolio securities are valued at market value as of the close of regular trading on the New York Stock Exchange ("NYSE") (normally, 4:00 p.m. Eastern time) on each business day the NYSE is open. Securities listed on the NYSE or other exchanges, other than options, are valued on the basis of their last sale prices on the exchanges on which they

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

are primarily traded. However, if the last sale price on the NYSE is different than the last sale price on any other exchange, the NYSE price will be used. If there are no sales on that day, the securities are valued at the last bid price on the NYSE or other primary exchange for that day. Securities which are quoted by NASDAQ are valued at the NASDAQ Official Closing Price. If there are no sales on that day, the securities are valued at the last bid price as reported by NASDAQ. Securities traded in over-the-counter markets, other than NASDAQ quoted securities, are valued at the last sales price, or if there are no sales on that day, at the mean of the closing bid and ask prices. Securities traded on a foreign stock exchange may be valued based upon the closing price on the principal exchange where the security is traded; however, because the value of securities traded on foreign stock exchanges may be materially affected by events occurring before the Funds' pricing time but after the close of the primary markets or exchanges on which such securities are traded, such securities will be valued at their fair value as determined by an independent pricing service approved by the Board of Trustees under circumstances where such value is believed to reflect the market values of such securities as of the time of computation of net asset values of the Funds. As a result, the prices of securities used to calculate a Fund's net asset value may differ from quoted or published prices for the same securities. Values of foreign securities are translated from the local currency into U.S. dollars using currency exchange rates supplied by an independent pricing quotation service.

Pursuant to procedures approved by the Board of Trustees, options traded on a national securities exchange are valued at prices between the closing bid and ask prices determined by Hussman Strategic Advisors, Inc. (the "Adviser") to most closely reflect market value as of the time of computation of net asset value. As of December 31, 2015, all options held by Hussman Strategic Growth Fund and Hussman Strategic Dividend Value Fund have been valued in this manner. Options not traded on a national securities exchange or board of trade, but for which over-the-counter market quotations are readily available, are valued at the mean of their closing bid and ask prices. Futures contracts and options thereon, which are traded on commodities exchanges, are valued at their last sale price as of the close of regular trading on the NYSE or, if not available, at the mean of the bid and ask prices.

Fixed income securities not traded or dealt in upon any securities exchange, but for which over-the-counter market quotations are readily available, generally are valued at the mean of their closing bid and ask prices. Fixed income securities may also be valued on the basis of prices provided by an independent pricing service.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

Investments representing shares of other investment companies are valued at their net asset value as reported by such companies.

In the event that market quotations are not readily available or are determined by the Adviser to not be reflective of fair market value due to market events or developments, securities and other financial instruments are valued at fair value as determined by the Adviser in accordance with procedures adopted by the Board of Trustees. Such methods of fair valuation may include, but are not limited to: multiple of earnings, multiple of book value, discount from market of a similar freely traded security, purchase price of security, subsequent private transactions in the security or related securities, or a combination of these and other factors.

GAAP establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosures about fair value measurements.

Various inputs are used in determining the value of each of the Funds' investments. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted unadjusted prices for identical instruments in active markets to which the Fund has access at the date of measurement.
- Level 2 – quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among market makers.
- Level 3 – model-derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund's own assumptions that market participants would use to price the asset or liability based on the best available information.

Option contracts purchased or written by Hussman Strategic Growth Fund and Hussman Strategic Dividend Value Fund are classified as Level 2 since they are valued using "other significant observable inputs" at prices between the closing bid and ask prices determined by the Adviser to most closely reflect market value. U.S. Treasury obligations held by Hussman Strategic Total Return Fund are classified as Level 2 since values are based on prices provided by an independent pricing service that utilizes various "other significant observable inputs" including bid and ask

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

quotations, prices of similar securities and interest rates, among other factors. Non-U.S. equity securities actively traded in foreign markets held by Hussman Strategic International Fund may be classified as Level 2 despite the availability of closing prices because such securities are frequently valued at their fair value as determined by an independent pricing service. The Board of Trustees has authorized Hussman Strategic International Fund to retain an independent pricing service to determine the fair value of its foreign portfolio securities when the value of such securities may be materially affected by events occurring before Hussman Strategic International Fund's pricing time but after the close of the primary markets or exchanges on which such foreign securities are traded. These intervening events might be: country-specific (e.g., natural disaster, economic or political developments, interest rate change); issuer specific (e.g., earnings report, merger announcement); or U.S. markets-specific (such as a significant movement in the U.S. markets that is deemed likely to affect the value of foreign securities). The pricing service uses an automated system incorporating a model based on multiple parameters, including a security's local closing price, relevant general and sector indices, currency fluctuations, trading in depository receipts and futures, if applicable, and/or research valuations by its staff, in determining what it believes is the fair value of the securities. The frequency of use of these procedures will depend on market events and thus cannot be predicted and the procedures may be utilized to a significant extent. Determining the fair value of portfolio securities involves reliance on judgment and a security's fair value may differ depending on the method used for determining value. There can be no assurance that Hussman Strategic International Fund could purchase or sell a portfolio security at the price used to calculate its net asset value. Because of the inherent uncertainty in fair valuations and the various factors considered in determining fair value, there can be significant deviations between a fair value at which a portfolio security is being carried and the price at which it can be sold. Moreover, to the extent Hussman Strategic International Fund has significant holdings of foreign securities, fair valuation may be used more frequently than for the other Funds.

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. The inputs used to measure the value of a particular security may fall into more than one level of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement of that security is determined to fall in its entirety is the lowest level input that is significant to the fair value measurement.

Hussman Investment Trust

Each Fund's Schedule of Investments identifies the specific securities (by type of security and industry type or geographical region) that comprise that Fund's holdings within the Level 1 and Level 2 categories shown in the tables above. As of December 31, 2015, Hussman Strategic Growth Fund, Hussman Total Return Fund and Hussman Strategic Dividend Value Fund did not have any transfers in and out of any Level. Transfers that occurred between Levels 1 and 2 on December 31, 2015 for Hussman Strategic International Fund due to implementation of systematic fair value procedures are as follows:

	Transfers from Level 1 to Level 2
Common Stocks	\$ 148,878

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

In addition, the Funds did not have any assets or liabilities that were measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of December 31, 2015. It is the Funds' policy to recognize transfers into and out of any level at the end of the reporting period.

Futures Contracts and Option Transactions — Hussman Strategic Growth Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund may purchase and write call and put options on broad-based stock indices and may also purchase and write call and put option contracts on individual securities. Each of the Funds may use financial futures contracts and related option contracts to hedge against changes in the market value of its portfolio securities. Hussman Strategic Total Return Fund and Hussman Strategic International Fund may also purchase foreign currency options to establish or modify the Funds' exposure to foreign currencies, and Hussman Strategic Total Return Fund may purchase interest rate futures contracts to protect against a decline in the value of its portfolio. Hussman Strategic International Fund may enter into forward foreign currency contracts to hedge against the adverse impact of changes in foreign exchange rates on its investments and transactions in foreign securities.

Hussman Strategic Growth Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund may each use futures and option contracts on stock indices for the purpose of seeking to reduce the market risk that would otherwise be associated with the securities in which it invests. For example, these Funds may sell a stock index futures contract to hedge the risk of a general market or market sector decline that might adversely affect prices of the Funds' portfolio securities. To the extent there is a correlation between a Fund's portfolio and a particular stock index, the sale of futures contracts on that index could reduce the Fund's exposure to general market risk.

When a Fund writes an index option, an amount equal to the net premium (the premium less the commission) received by the Fund is recorded as a liability in the Fund's Statement of Assets and Liabilities and is subsequently marked-to market daily. If an index option written by the Fund expires unexercised on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain or a loss depending on whether the cost of a closing purchase transaction is less than or exceeds the net premium received when the option was sold and the liability related to such option will be eliminated. If an index option written by the Fund is exercised, the Fund will be required to pay the difference between the closing index value and the exercise price of the option. In this event, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

When a Fund purchases or sells a stock index futures contract, no price is paid to or received by the Fund upon the purchase or sale of the futures contract. Instead, the Fund is required to deposit in a segregated asset account an amount of cash or qualifying securities currently ranging from 2% to 11% of the contract amount. This is called "initial margin." Subsequent payments, known as "variation margin," are made or received by the Fund each day, depending on the daily fluctuations in the value of the underlying stock index. The Fund recognizes an unrealized gain or loss equal to the daily variation margin. If market conditions move unexpectedly, the Fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. In addition to the possibility that there may be an imperfect correlation or no correlation at all between the movements in the stock index futures and the portion of the portfolio being hedged, the price of the stock index futures may not correlate perfectly with movements in the stock index due to certain market distortions.

Foreign Currency Translation — Amounts and securities denominated in or expected to settle in foreign currencies are translated into U.S. dollars based on exchange rates on the following basis:

- A. The values of investment securities and other assets and liabilities are translated as of the close of the NYSE each day.
- B. Purchases and sales of investment securities and income and expenses are translated at the rate of exchange prevailing as of 4:00 p.m. on the respective date of such transactions.
- C. The Funds do not isolate that portion of the results of operations caused by changes in foreign exchange rates on investments from those caused by changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gains or losses on investments.

Reported net realized foreign exchange gains or losses arise from: (1) purchases and sales of foreign currencies; (2) currency gains or losses realized between the trade and settlement dates on securities transactions; and (3) the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Reported net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities that result from changes in exchange rates.

Share Valuation and Redemption Fees — The net asset value per share of each Fund is calculated as of the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time) on each day that the NYSE is open for business. The net asset value per share of each Fund is calculated by dividing the total value of the Fund's assets, less its

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

liabilities, by the number of its shares outstanding. The offering price and redemption price per share of each Fund is equal to the net asset value per share. However, shares of each Fund are generally subject to a redemption fee of 1.5%, payable to the applicable Fund, if redeemed 60 days or less from the date of purchase. During the periods ended December 31, 2015 and June 30, 2015, proceeds from redemption fees, recorded in capital, totaled: \$148,506 and \$56,369, respectively, for Hussman Strategic Growth Fund; \$4,484 and \$16,624, respectively, for Hussman Strategic Total Return Fund; \$1,655 and \$2,981, respectively, for Hussman Strategic International Fund; and \$0 and \$450, respectively, for Hussman Strategic Dividend Value Fund.

Investment Income — Interest income is accrued as earned. Dividend income is recorded on the ex-dividend date. Discounts and premiums on fixed income securities are amortized using the interest method.

Distributions to Shareholders — Dividends from net investment income, if any, are declared and paid annually to shareholders of Hussman Strategic Growth Fund and Hussman Strategic International Fund and are declared and paid quarterly to shareholders of Hussman Strategic Total Return Fund and Hussman Strategic Dividend Value Fund. Net realized short-term capital gains, if any, may be distributed throughout the year and net realized long-term capital gains, if any, are generally distributed annually. The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These “book/tax” differences are either temporary or permanent in nature and are primarily due to timing differences in the recognition of capital gains or losses on option and futures transactions, losses deferred due to wash sales and treatment of foreign currency transactions. The tax character of distributions paid by each Fund during the periods ended December 31, 2015 and June 30, 2015 was as follows:

	Period Ended	Ordinary Income	Long-Term Capital Gains	Total Distributions
Hussman Strategic Growth Fund	12/31/15	\$ 3,386,901	\$ —	\$ 3,386,901
	6/30/15	\$ 6,533,912	\$ —	\$ 6,533,912
Hussman Strategic Total Return Fund	12/31/15	\$ 1,124,569	\$ —	\$ 1,124,569
	6/30/15	\$ 4,554,461	\$ —	\$ 4,554,461
Hussman Strategic International Fund	12/31/15	\$ —	\$ —	\$ —
	6/30/15	\$ 759,883	\$ —	\$ 759,883
Hussman Strategic Dividend Value Fund	12/31/15	\$ 73,587	\$ 75,053	\$ 148,640
	6/30/15	\$ 936,511	\$ —	\$ 936,511

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

Securities Transactions — Securities transactions are accounted for on trade date for financial reporting purposes. Gains and losses on securities sold are determined on a specific identification basis.

Common Expenses — Expenses of the Trust not attributable solely to one of the Funds are allocated among the Funds based on relative net assets of each Fund or the nature of the expense and the relative applicability to each Fund.

Accounting Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

Federal Income Tax — Each Fund has qualified and intends to continue to qualify each year as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986 (the “Code”). By so qualifying, a Fund will not be subject to federal income taxes to the extent that it distributes its net investment income and any net realized capital gains in accordance with the Code. Accordingly, no provision for income taxes has been made.

In order to avoid imposition of a federal excise tax applicable to regulated investment companies, it is each Fund’s intention to declare and pay as dividends in each calendar year at least 98% of its net investment income (earned during the calendar year) and 98.2% of its net realized capital gains (earned during the twelve months ended October 31) plus undistributed amounts from prior years.

Other gains (losses)	(1,633,741)	1,762,020	2,022,579	(63,356)
Other temporary differences . . .	(286,601)	(50,699)	—	(413)
Total accumulated earnings (deficit)	<u>\$ (1,959,627,418)</u>	<u>\$ (114,835,552)</u>	<u>\$ (14,976,605)</u>	<u>\$ (464,717)</u>

The following information is based upon the federal income tax cost of investment securities as of December 31, 2015:

	Hussman Strategic Growth Fund	Hussman Strategic Total Return Fund	Hussman Strategic International Fund	Hussman Strategic Dividend Value Fund
Cost of investments and money market funds	<u>\$ 861,766,758</u>	<u>\$ 413,877,999</u>	<u>\$ 32,114,196</u>	<u>\$ 10,735,479</u>
Gross unrealized appreciation . .	<u>\$ 54,140,923</u>	<u>\$ 5,677,380</u>	<u>\$ 3,167,502</u>	<u>\$ 317,800</u>
Gross unrealized depreciation . .	<u>(23,703,866)</u>	<u>(21,713,875)</u>	<u>(1,158,309)</u>	<u>(723,200)</u>
Net unrealized appreciation (depreciation)	<u>\$ 30,437,057</u>	<u>\$ (16,036,495)</u>	<u>\$ 2,009,193</u>	<u>\$ (405,400)</u>

The difference between the federal income tax cost of portfolio investments and the financial statement cost of portfolio investments for each Fund is due to certain timing differences in the recognition of capital gains or losses under income tax regulations and GAAP. These “book/tax” differences are temporary in nature and are primarily due to losses deferred due to wash sales and adjustments to basis on publicly traded partnerships.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

As of June 30, 2015, the Funds had the following capital loss carryforwards ("CLCFs") for federal income tax purposes:

	Hussman Strategic Growth Fund	Hussman Strategic Total Return Fund	Hussman Strategic International Fund	Hussman Strategic Dividend Value Fund
Expires June 30, 2018 – short-term	\$ 375,427,325	\$ —	\$ —	\$ —
Expires June 30, 2019 – short-term	824,973,031	—	—	—
No expiration – short-term	585,452,182	84,806,351	16,410,479	—
No expiration – long-term	200,307,886	15,906,399	1,233,758	—
	<u>\$ 1,986,160,424</u>	<u>\$ 100,712,750</u>	<u>\$ 17,644,237</u>	<u>\$ —</u>

These CLCFs may be utilized in the current and future years to offset net realized capital gains, if any, prior to distributing such gains to shareholders.

Given the current net assets of Hussman Strategic Growth Fund, it is highly uncertain that the Fund will be able to fully utilize a significant portion of its CLCFs prior to their expiration. Such CLCFs cannot be utilized prior to the utilization of new CLCFs created after December 31, 2010, which have no expiration date.

For the six months ended December 31, 2015, Hussman Strategic International Fund reclassified \$145,328 of net realized losses on foreign currency transactions against accumulated net investment loss on the Statement of Assets and Liabilities. This reclassification is the result of permanent differences between the financial statement and income tax reporting requirements. It has no effect on the Fund's total net assets or its net asset value per share.

Each Fund recognizes the tax benefits or expenses of uncertain tax positions only when the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has reviewed each Fund's tax positions taken on federal income tax returns for the current tax year and all open tax years (tax years ended June 30, 2012 through June 30, 2015) and has concluded that no provision for unrecognized tax benefits or expenses is required in these financial statements.

2. INVESTMENT TRANSACTIONS

During the six months ended December 31, 2015, cost of purchases and proceeds from sales and maturities of investment securities, other than short-term investments and U.S. government securities, amounted to: \$563,243,635 and \$675,125,195, respectively, for Hussman Strategic Growth Fund; \$300,802,313 and \$439,402,305,

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

respectively, for Hussman Strategic Total Return Fund; \$16,608,732 and \$15,692,504, respectively, for Hussman Strategic International Fund; and \$4,391,490 and \$4,759,727, respectively for Hussman Strategic Dividend Value Fund.

3. TRANSACTIONS WITH AFFILIATES

Advisory Agreement

Under the terms of an Advisory Agreement between the Trust and the Adviser, Hussman Strategic Growth Fund pays the Adviser a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.90% of the first \$2 billion of its average daily net assets; 0.85% of the next \$3 billion of such assets; and 0.80% of such assets over \$5 billion, less any fee reductions. Under the terms of a separate Advisory Agreement between the Trust and the Adviser, Hussman Strategic Total Return Fund pays the Adviser a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.50% of the first \$1 billion of its average daily net assets; 0.45% of the next \$1.5 billion of such assets; and 0.40% of such assets over \$2.5 billion, less any fee reductions. Under the terms of a separate Advisory Agreement between the Trust and the Adviser, Hussman Strategic International Fund pays the Adviser a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.95% of the first \$2 billion of average daily net assets; 0.90% of the next \$3 billion of such assets; and 0.85% of such assets over \$5 billion, less any fee reductions. Under the terms of a separate Advisory Agreement between the Trust and the Adviser, Hussman Strategic Dividend Value Fund pays the Adviser a fee, which is computed and accrued daily and paid monthly, at annual rates of 0.90% of the first \$2 billion of average daily net assets; 0.85% of the next \$3 billion of such assets; and 0.80% of such assets over \$5 billion, less any fee reductions.

The Adviser has contractually agreed to reduce its advisory fees and/or to absorb operating expenses to the extent necessary so that ordinary operating expenses of each of Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund do not exceed annually an amount equal to 1.10%, 0.70%, 2.00% and 1.25%, respectively, of such Fund's average daily net assets. These Expense Limitation Agreements remain in effect until at least November 1, 2016. Prior to November 1, 2015, the expense limit was 1.07% of average daily net assets with respect to Hussman Strategic Growth Fund, and the expense limit was 0.68% of average daily net assets with respect to Hussman Strategic Total Return Fund. During the six months ended December 31, 2015, the Adviser reduced its advisory fees and/or reimbursed expenses in the amount of \$212,740, \$153,751 and \$126,231 with respect to Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund and Hussman Strategic Dividend Value Fund, respectively.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

Any fee reductions or expense reimbursements by the Adviser are subject to repayment by the Funds provided that such repayment does not result in Hussman Strategic Growth Fund's, Hussman Strategic Total Return Fund's, Hussman Strategic International Fund's or Hussman Strategic Dividend Value Fund's ordinary operating expenses exceeding an amount equal to 1.07%, 0.63%, 2.00% and 1.25%, respectively, of such Fund's average daily net assets, and provided further that the fee reductions or expenses which are the subject of the repayment were waived or incurred (as applicable) within three years of such repayment. As of December 31, 2015, the amount of fee reductions and expense reimbursements available for recovery by the Adviser from Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund and Hussman Strategic Dividend Value Fund is \$1,664,113, \$1,495,507 and \$775,988, respectively. The portion of these amounts that the Adviser may recover expire as of the following dates:

	<u>June 30, 2016</u>	<u>June 30, 2017</u>	<u>June 30, 2018</u>	<u>December 31, 2018</u>
Hussman Strategic Growth Fund	\$ 361,365	\$ 666,017	\$ 423,991	\$ 212,740
Hussman Strategic Total Return Fund	\$ 227,087	\$ 733,334	\$ 381,335	\$ 153,751
Hussman Strategic Dividend Value Fund	\$ 152,327	\$ 236,279	\$ 261,151	\$ 126,231

Certain officers of the Trust are also officers of the Adviser.

Other Service Providers

Ultimus Fund Solutions, LLC ("Ultimus") provides fund administration, fund accounting, compliance and transfer agency services to the Funds. The Funds pay Ultimus fees for its services in accordance with various servicing agreements. In addition, the Funds pay out-of-pocket expenses including, but not limited to postage, supplies and costs of pricing the Funds' portfolio securities. Certain officers of the Trust are also officers of Ultimus, or of Ultimus Fund Distributors, LLC (the "Distributor"), the principal underwriter of the Funds. The Distributor is a wholly-owned subsidiary of Ultimus.

For shareholder accounts held through financial intermediaries, the Funds may, in some cases, compensate these intermediaries for providing certain account maintenance and shareholder services. During the six months ended December 31, 2015, Hussman Strategic Growth Fund, Hussman Strategic Total Return Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund paid

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

\$179,112, \$125,494, \$10,232 and \$562, respectively, to financial intermediaries for such services. These amounts are included in transfer agent, account maintenance and shareholder services fees on the Statements of Operations.

Trustee Compensation

Trustees and officers affiliated with the Adviser or Ultimus are not compensated by the Trust for their services. Each Trustee who is not an affiliated person of the Adviser or Ultimus receives from the Trust an annual retainer of \$60,000, payable quarterly; a fee of \$10,000 for attendance at each in-person meeting of the Board of Trustees (except that such fee is \$15,000 with respect to the annual meeting of the Board) and a fee of \$4,000 for attendance at each telephone meeting of the Board of Trustees; a fee of \$3,000 for attendance at each meeting of any committee of the Board; a fee of \$1,500 for participation in each informal telephone monthly conference call of the Board; plus reimbursement of travel and other expenses incurred in attending meetings.

4. DERIVATIVES TRANSACTIONS

Transactions in option contracts written by Hussman Strategic Growth Fund and Hussman Strategic Dividend Value Fund during the six months ended December 31, 2015 were as follows:

Hussman Strategic Growth Fund

	Option Contracts	Option Premiums
Options outstanding at beginning of period	3,950	\$ 380,989,467

Hussman Strategic Total Return Fund had no transactions in derivative instruments during the six months ended December 31, 2015.

In the ordinary course of business, Hussman Strategic Growth Fund, Hussman Strategic International Fund and Hussman Strategic Dividend Value Fund may enter into transactions subject to enforceable netting agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows each Fund to offset the exposure it has on any transaction with a specific counterparty with any collateral it has received or delivered in connection with other transactions with that counterparty. Generally, the Funds manage their cash collateral securities and securities collateral on a counterparty basis. The offsetting of financial assets and derivatives assets as of December 31, 2015 is as follows:

Hussman Strategic International Fund

Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in Statements of Assets and Liabilities	Net Amounts of Assets Presented in Statements of Assets and Liabilities	Collateral Pledged	Net Amount
Variation margin receivable - futures contracts	\$ 2,160,622	\$ —	\$ 2,160,622	\$ —	\$ 2,160,622

Total subject to a master netting or similar arrangement	\$ 2,574,250	\$ —	\$ 2,574,250	\$ —	\$ 2,574,250

5. CERTAIN INVESTMENTS AND RISKS

The securities in which the Funds invest, as well as the risks associated with these securities and with the investment programs of the Funds, are described in the Funds' Prospectuses. Among these risks are those associated with investments in derivative instruments, investments in shares of money market mutual funds, concentration of investments within a particular business sector and, in the case of Hussman Strategic International Fund, investments in foreign securities.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

Risks of Derivative Instruments — The purchase and sale of derivative instruments, including options and futures contracts, and other derivative transactions involve risks different from those involved with direct investments in securities and also require different skills from the Adviser in managing each Fund's portfolio of investments. While utilization of options, futures contracts and similar instruments may be advantageous to the Funds, if the Adviser is not successful in employing such instruments in managing a Fund's investments or in predicting market changes, the Fund's performance will be worse than if the Fund did not make such investments. It is possible that there will be imperfect correlation, or even no correlation, between price movements of the investments being hedged and the options, futures or other derivative instruments used. It is also possible that a Fund may be unable to close out or liquidate its hedges during unusual periods of illiquidity in the options, futures or other markets. In addition, a Fund will pay commissions and other costs in connection with such instruments, which may increase its expenses and reduce its investment performance.

Investments in Money Market Funds — In order to maintain sufficient liquidity to implement investment strategies, or for temporary defensive purposes, each Fund may invest a significant portion of its assets in shares of one or more money market funds. As of December 31, 2015, Hussman Strategic Growth Fund and Hussman Strategic Dividend Value Fund had 44.4% and 38.6%, respectively, of the value of their net assets invested in money market funds registered under the Investment Company Act of 1940, including 31.0% and 27.0%, respectively, of the value of their net assets invested in shares of a single money market fund. An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, entity or person. While investor losses in money market funds have been rare, they are possible. In addition, the Funds incur additional indirect expenses due to acquired fund fees and other costs to the extent they invest in shares of money market funds.

Sector Risk — If a Fund has significant investments in the securities of issuers in industries within a particular business sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. This may increase the risk of loss of an investment in the Fund and increase the volatility of the Fund's net asset value per share. From time to time, circumstances may affect a particular sector and the companies within such sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector and therefore the value of a Fund's portfolio could be adversely affected. As of December 31, 2015, Hussman

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 *(Unaudited)*

Strategic Growth Fund and Hussman Strategic Dividend Value Fund had 38.8% and 26.3%, respectively, of the value of their net assets invested in stocks within the Information Technology sector.

Foreign Investment Risk — Compared with investing in the United States, investing in foreign markets involves a greater degree and variety of risks. Investors in foreign markets may face delayed settlements, currency controls and adverse economic developments as well as higher overall transaction costs. In addition, fluctuations in the U.S. dollar's value versus other currencies may erode or reverse gains from investments denominated in foreign currencies or increase losses. Foreign governments may expropriate assets, impose capital or currency controls, impose punitive taxes, impose limits on ownership or nationalize a company or industry. Any of these actions could have a severe effect on security prices and impair an investor's ability to bring its capital or income back to the U.S. Exchange rate fluctuations also may impair an issuer's ability to repay U.S. dollar denominated debt, thereby increasing credit risk of such debt. The value of foreign securities may be affected by incomplete, less frequent or inaccurate financial information about their issuers, social upheavals or political actions ranging from tax code changes to government collapse. Foreign companies may also receive less coverage than U.S. companies by market analysts and may be subject to different reporting standards or regulatory requirements than those applicable to U.S. companies.

6. FORWARD FOREIGN CURRENCY EXCHANGE CONTRACTS

Hussman Strategic International Fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objective. Hussman Strategic International Fund may (but is not required to) enter into contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date as a hedge or cross-hedge against either specific transactions or portfolio positions generally. The purpose of Hussman Strategic International Fund's foreign currency hedging transactions is to reduce the risk that the U.S. dollar value of the Fund's securities denominated in foreign currency will decline in value due to changes in foreign currency exchange rates. All foreign currency exchange contracts are "marked-to-market" daily at the applicable translation rates resulting in unrealized gains or losses. Realized and unrealized gains or losses from transactions in foreign currency exchange contracts will be included in the Fund's Statement of Assets and Liabilities and Statement of Operations. Risks associated with these contracts include the potential inability of counterparties to meet the terms of their contracts and unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

As of December 31, 2015, Hussman Strategic International Fund had no forward currency exchange contracts outstanding.

7. BANK LINE OF CREDIT

Hussman Strategic Growth Fund has an unsecured bank line of credit in the amount of \$10,000,000. Hussman Strategic Total Return Fund has an unsecured bank line of credit in the amount of \$2,000,000. Borrowings under these arrangements bear interest at a rate determined by the lending bank at the time of borrowing. During the six months ended December 31, 2015, the Funds did not borrow under their respective lines of credit. Neither Hussman Strategic International Fund nor Hussman Strategic Dividend Value Fund currently has a bank line of credit.

8. CONTINGENCIES AND COMMITMENTS

The Trust's officers and Trustees are entitled to indemnification from the Funds for certain liabilities to which they may become subject in connection with the performance of their duties to the Funds. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties and which may require the Funds to indemnify the other parties to the contracts in the event of certain losses. The Funds' maximum exposure under these arrangements is unknown, as this would involve potential claims for indemnification for losses that may or may not be incurred in the future. However, based on experience, the Trust believes the risk of loss to be remote.

9. LEGAL PROCEEDINGS

Several lawsuits have been filed relating to Hussman Strategic Growth Fund's investment in Tribune Company common stock in connection with Tribune Company's Chapter 11 bankruptcy. The lawsuits stem from a leveraged buyout by which Tribune Company converted to a privately-held company in 2007. Hussman Strategic Growth Fund was named as a defendant in an adversary proceeding brought by The Official Committee of Unsecured Creditors of Tribune Company in the U.S. Bankruptcy Court for the District of Delaware in 2010. That action was subsequently transferred to the U.S. District Court for the Southern District of New York by order of the Judicial Panel on Multidistrict Litigation, and Marc S. Kirschner, the Litigation Trustee for the Tribune Litigation Trust, became successor plaintiff to the Creditors Committee on December 31, 2012, the effective date of Tribune Company's plan of reorganization. The Trust and Hussman Strategic Growth Fund were also named as defendants in a lawsuit filed by the indenture trustees of certain noteholders of Tribune Company in the U.S. District

Hussman Investment Trust

Notes to Financial Statements *(continued)*

December 31, 2015 (Unaudited)

Court for the Southern District of Ohio in 2011. Hussman Strategic Growth Fund and the Adviser were named as defendants in a similar action in the U.S. District Court for the District of Maryland in 2011. Both of those actions have been transferred to the U.S. District Court for the Southern District of New York for coordinated proceedings with many other similar lawsuits brought by individual creditors against former Tribune Company shareholders and the action currently prosecuted by the Tribune Litigation Trustee. The Trust, Hussman Strategic Growth Fund, and the Adviser may also be putative defendant class members in some of these actions. The plaintiffs in all these lawsuits seek to recover amounts paid to shareholders of Tribune Company in connection with the leveraged buyout, plus interest and attorneys' fees and expenses.

An omnibus motion to dismiss the actions filed by the individual creditors (but not the action prosecuted by the Litigation Trustee for the Tribune Litigation Trust) was filed in November 2012. On September 23, 2013, the U.S. District Court Judge issued a decision and order dismissing those actions in full. The plaintiffs in those actions have appealed that decision to the U.S. Court of Appeals for the Second Circuit and certain shareholder defendants, including the Hussman entities, cross-appealed. Briefing on the appeal and the cross-appeal was completed on April 25, 2014, and oral argument was held on November 5, 2014. The Second Circuit has yet to issue a decision.

On August 2, 2013, with the District Court's permission, the Litigation Trustee filed an amended complaint that named Hussman Strategic Growth Fund as one of the class representatives for the putative class of shareholder defendants. The Court issued a protocol regarding a global motion to dismiss on behalf of all shareholder defendants on April 24, 2014. Briefing on the global motion to dismiss was completed on July 3, 2014. No date for oral argument has been set.

The lawsuits allege no misconduct by the Trust, Hussman Strategic Growth Fund, or the Adviser, and all the Hussman entities intend to defend themselves vigorously in the lawsuits. If the lawsuits were to be decided or settled in a manner adverse to Hussman Strategic Growth Fund, the payment of such judgments or settlements could adversely affect the Fund's net asset value per share. The adverse impact to Hussman Strategic Growth Fund is not expected to exceed materially the value of the proceeds received by the Fund in connection with the leveraged buyout, which was \$29,432,814 (which constitutes, as of December 31, 2015, approximately 4.9% of the Fund's net assets), plus interest.

December 31, 2015 (Unaudited)

10. SUBSEQUENT EVENTS

The Funds are required to recognize in their financial statements the effects of all subsequent events that provide additional evidence about conditions that existed as of the date of the Statements of Assets and Liabilities. For non-recognized subsequent events that must be disclosed to keep the financial statements from being misleading, the Funds are required to disclose the nature of the event as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. Management has evaluated subsequent events through the date of issuance of these financial statements and has noted no such events.

Hussman Investment Trust

About Your Funds' Expenses *(Unaudited)*

We believe it is important for you to understand the impact of costs on your investment. As a shareholder of the Funds, you incur two types of costs: (1) transaction costs, which may include redemption fees; and (2) ongoing costs, including management fees and other Fund expenses. The following examples are intended to help you understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds. A mutual fund's ongoing costs are expressed as a percentage of its average net assets. This figure is known as the expense ratio.

The examples below are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (July 1, 2015 – December 31, 2015).

The table on the following page illustrates each Fund's ongoing costs in two ways:

Actual fund return – This section helps you to estimate the actual expenses that you paid over the period. The "Ending Account Value" shown is derived from each Fund's actual return, and the fourth column shows the dollar amount of operating expenses that would have been paid by an investor who started the period with \$1,000 invested in that Fund. You may use that information, together with the amount of your investment, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), and then multiply the result by the number given for the applicable Fund under the heading "Expenses Paid During Period."

Hypothetical 5% return – This section is intended to help you compare each Fund's ongoing costs with those of other mutual funds. It assumes that each Fund had an annual return of 5% before expenses during the period shown. In this case, because the return used is not each Fund's actual return, the results do not illustrate the actual expenses associated with your investment. However, the example is useful in making comparisons because the Securities and Exchange Commission ("SEC") requires all mutual funds to provide an example of fund expenses based on a 5% annual return. You can assess each Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other mutual funds.

Note that expenses shown in the table are meant to highlight and help you compare ongoing costs only. The expense ratios used in computing annual expenses in the tables are the expense ratios of the Funds during the six-month period ended December 31, 2015, annualized, after fee waivers. Actual expenses of the Funds in

Hussman Investment Trust

About Your Funds' Expenses (Unaudited) (continued)

future periods may differ. The calculations assume no shares were bought or sold during the period. Your actual costs may have been higher or lower, depending on the amount of your investment and the timing of any purchases or redemptions.

More information about each Fund's expenses, including annual expense ratios, can be found elsewhere in this report. For additional information on operating expenses and other shareholder costs, please refer to each Fund's prospectus.

	Beginning Account Value July 1, 2015	Ending Account Value December 31, 2015	Net Expense Ratio ^(a)	Expenses Paid During Period ^(b)
Hussman Strategic Growth Fund				
Actual	\$1,000.00	\$ 945.50	1.08%	\$ 5.28
Hypothetical 5% Return (before expenses)	\$1,000.00	\$ 1,019.71	1.08%	\$ 5.48
Hussman Strategic Total Return Fund				
Actual	\$1,000.00	\$ 980.60	0.69%	\$ 3.44
Hypothetical 5% Return (before expenses)	\$1,000.00	\$ 1,021.67	0.69%	\$ 3.51
Hussman Strategic International Fund				
Actual	\$1,000.00	\$ 1,036.20	2.00%	\$10.24
Hypothetical 5% Return (before expenses)	\$1,000.00	\$ 1,015.08	2.00%	\$10.13
Hussman Strategic Dividend Value Fund				
Actual	\$1,000.00	\$ 941.60	1.25%	\$ 6.10
Hypothetical 5% Return (before expenses)	\$1,000.00	\$ 1,018.85	1.25%	\$ 6.34

^(a) Annualized, based on the Fund's most recent one-half year expenses.

^(b) Expenses are equal to each Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).
